

Design File Sizes

All designs are done in 18 stitches per inch size. You can make them larger in your sewing software without changing density. Each software is different, but any program that will allow you to change the size of a design will work. Density changes proportionately with the size of the X without changing the density settings.

You will find designs in each set that may be larger than the 4" hoop. Unless otherwise indicated, they will fit the 5x7 hoop. They are listed below.

Baby Set :

Designs 1 and 4

Floral Set

Designs 11 and 13. # 8 is a jumbo hoop design (6x10)

Sewing Set
